## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21 are drawn to a method, for creating a computer program by identifying a set of actions when using a cryptographic key, so that computer program can take such actions without requiring access to said key, classified in class 713, subclass 131.
- II. Claims 22-31 are drawn to a method, for performing a diversionary second set of actions different from a first set of actions, classified in class 713, subclass 190.
- III. Claims 32, 34-44 are drawn to a method, of performing an action on a computing device performing a subaction, classified in class 717, subclass 140.
- IV. Claims 45, 46, 49-62 are drawn to a method, of creating a computer program for performing a first action on two different occasions with two sets of computer executable instructions at a first and second location classified in class 713, subclass 194.
- V. Claims 63-70 drawn to a method, which detects modification or deletion of a portion of computer executable instructions and restores said portion, classified in class 713, subclass 187.
- VI. Claims 71-73 are drawn to a method, that uses error correction techniques with a second set of instructions to detect variations on a first set of instructions classified in class 714, subclass 15.

Art Unit: 2134

Inventions I-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). The inventions are distinct, each from the other because of the following reasons:

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
